

## AdManipulator v. 2.0.3 Features

Morris Digital Works presents a new and improved AdManipulator. Our latest version, 2.0.3, offers the following outstanding enhancements:

### Improved User Interface

- ❑ Includes special icons to distinguish organizations, properties, and categories.
- ❑ Displays Multimedia attachments associated with ads.
- ❑ Customizes specific information you wish to view in the **All Ads for Category** screen.
- ❑ Creates Ad Order Entry (AOE) pricing packages specific to categories and properties.

### Greater Administrative Usability (for those with Super User Privileges)

- ❑ Includes a revised Codeset Manager and an improved Persistent Search Manager.

#### ***Codeset Manager***

- Forms parent-child relationships for greater organization.

#### ***Persistent Search (PSearch) Manager***

- Searches for users by username, e-mail address, or first and last name.
- Displays PSearch packages for every PSearch account available.
- Provides data relating to individual PSearches.

### Bug and Feature Reporting

- ❑ Reports bugs and then automatically generates a ticket number for you.
- ❑ Requests features and then automatically generates a ticket number for you.
