

Template Manager 2 v. 10.5.5 Features' List

Morris Digital Works presents a new and improved Template Manager 2. Our latest version, 10.5.5, offers the following outstanding enhancements:

Improved User Interface

- ❑ Includes special icons to distinguish organizations, properties, categories, and templates in the Property Tree.
- ❑ Provides faster and convenient searches for templates from any organization, property, or category location.
- ❑ Purges a single URL from the caching mechanism for any property you have access to edit, providing you use Squid Cache.

Improved User Preferences

- ❑ Sorts the Property Tree by alphabet values in ascending or descending order or by ASCII values in ascending or descending order.
- ❑ Provides the name and ID of any organization, property, category, or template in the Property Tree.
- ❑ Expands specific template information, including name, ID, genre, and the user who has checked out a template.
- ❑ Displays the names of tags or the actual tags themselves in the Tag Tree.

New Template Security Features

- ❑ Requires you to check out a template before editing it and allows you to check in a template once you finish.
- ❑ Creates permanent public and private notes about templates.

New Import and Export Options

- ❑ Imports categories and templates from one location to another.
- ❑ Exports subtrees and categories and then imports them to another database.

Bug and Feature Reporting

- ❑ Reports bugs and then automatically generates a ticket number for you.
- ❑ Requests features and then automatically generates a ticket number for you.
